

WOYSA Score Reporting Procedure

THE WOYSA PHILOSOPHY - We are a “recreational” soccer program with the goal of providing an enjoyable soccer experience to all players and parents involved in the organization. As such, it is intended that all players, regardless of ability, be given an equal opportunity to enjoy the game of soccer.

In the spirit of that philosophy, WOYSA will begin to monitor game results during the 2010 Spring Session. The sole intent of gathering this information is to allow WOYSA to monitor game results and address any significant disparity in scores. League standings will not be maintained.

The following outlines the responsibilities of Coaches, Division Coordinators and the Recreational Division Director...

- The Head Coach of each team is required to report their game’s result to the appropriate Division Coordinator by the Monday following their game. Scores can be easily reported via WOYSA’s “Contact” page on the WOYSA.org website. Each Division Coordinator’s e-mail address is provided as a link.
- Each Division Coordinator will provide a weekly summary of scores to the Recreation Division Director by the Wednesday following each week’s games.
- The Recreation Division Director will review the scores of each age level and identify any significant goal disparities on a weekly basis. The Recreation Division Director will communicate specific concerns with the Executive Board and appropriate action will be taken to insure that the spirit of WOYSA’s philosophy is maintained.

* WOYSA’s Three Goal Deficit Policy is below for your review.

Three Goal Deficit Policy

- Upon reaching a three-goal deficit, the trailing team would be allowed to place an additional player on the field. The additional player may remain on the field until the score of the game is tied, at which point the additional player must be removed from the game so that both teams again have an equal number of players.
- If an additional player cannot be fielded due to the lack of additional players, the coach of the leading team must remove one player until such time that the score is tied.
- If the goal differential continues to climb, at five points the team in the lead shall remove a player from the field. The leading team may return the player to the game when the differential returns to four points.

This rule is not meant to mitigate the coach's responsibility to take any other measures necessary to keep the game's final score within a 5 point differential.
